Comments for PSYC448101_2015F_RES PRAC/BEHAVIOR NEUROSC - Christina Reppucci

What are the strengths of this course?

Comment
Small class that allowed for discussion about topics covered. Engaging professor who knew a lot about the subject. Assignments didn't feel forced and were all beneficial and relevant.
Professor Reppucci is really engaging and she brings cookies to class!
The knowledge learned in this class is going to be very useful for me in the present and in the future. I learned so many behavioral techniques. The literature review and final paper really challenge you to do what will be expected of you in grad school. Therefore this practice was very helpful.
Covered a huge range of techniques

How could the instructor improve the course?

Comment
More cookies!
I honestly cannot think of anything.
I think everyone should be required to write a small one page paper the week after each lecture, on a paper using that method. It would stop students from being lazy and not reading the student's paper and then not learning anything about that method outside of lecture. It would also give more he
more practice examples of application

Would you recommend this course to other students, majors, etc.? Why or why not?

Comment
Yes. Super helpful if interested in any form of behavioral research or just research in general.
I would highly recommend it to other psych majors!
Absolutely. I would recommend this course specifically to anyone who wants to pursue a career in animal research.
yes, if they were interested in BN research, especially

Additional Comments:

Comment
Christina was a great teacher. Very nice, intelligent, challenging, understanding, and kind. She made herself easily available outside of class as well. Great teacher!
